Section 1

- Introduction
- MXROAD key features
- Basic concepts
- Getting started
- Create new project
- Working environments
- View controls in MX

Section 2

- CAD Environment
- CAD tools

Section 3

- Enhanced menu and GUI changes
- Survey inputs and validation
- String names and drawing styles
- String names and drawing styles

Section 4

- Element of geometry design
- Mx command language & Input files
- All geometry and Tasks

Section 5

- Status: Deriving information from display
- Point related
- Point selection methods
- Distance/ dimension related
- Model analysis

- Triangulation
- Data conflicts

Section 6

- Surface analysis
- Dynamic surface analysis
- File management
- String naming convention

Section 7

- Edit models
- 2D to 3D view surface
- Create model
- Delete a model
- Free/secure a model
- Rename a model
- Trim a model to a boundary
- Create composite model
- Edit strings
- Create string dynamically
- Create string
- Edit points

Section 8

- Design- quick alignment
- Alignment
- Horizontal design
- Horizontal design toolbar
- Report

Section 9

- Design- Vertical profile
- Design model
- Existing model
- Collinear profile model
- Vertical profile toolbar

Section 10

- Design- alignment by element method
- Begin horizontal design
- Horizontal alignment -Element method
- Best fit alignment
- Best fit horizontal alignment- Element
- Best fit alignment- vertical string

Section 11

- Road design- carriageways
- Rule based super elevation
- Cross fall checker
- Road design- road widening
- Dynamic reports.
- Types of reports
- Adding annotation
- Saving report

Section 12

- Junction design
- Create fillet
- Regrade junction
- Traffic island

- Tidy junction
- Road design- shoulder design
- Road design- kerbs, verges and footways
- Earthwork design
- Earthwork model details
- Assign Earthwork Style and Strategy
- Earthwork style open
- Alternative strategy
- End earthworks

Section 13

- Pavement and subgrade design
- Model details
- Pavement layer design
- Pavement layer design- Style set
- Pavement styles –Areas and Zones

Section 14

- Dynamic section
- Final Drawings Manager
- Base drawing
- Types of drawings
- Plan
- Profile

Section 15

- Final Drawings Manager
- Create cross sections
- Display cross sections
- Layout pages

- Page setup
- Create or edit page setup
- Page layout
- Edit page layout
- Annotate drawing
- Publish drawings

Section 16

- Road Re-design and Rehabilitation
- MX RENEW
- Template method
- Tabular method
- Overlay design -Template method
- Start a scheme
- Define surface wizard
- Corridor design
- Corridor design- Editor view

Section 17

- Testing a design
- Isopach analysis
- Composite model
- Automatic seeding
- Visibility
- Through visibility
- Visibility viewer
